

YAML & JSON : The Next Level

Sequence in YAMLs

YAML

YAML, JSON, JSONPath

- Sequence are values listed in specific Order. In YAML Sequence starts with **dash(-)** and **space**.
- Sequence is equivalent to List in Programming languages.
- **Block Style** uses Spaces to structure the List.
- In **Flow Style**, user can write sequence in single line within square brackets.
- User can embed a sequence in another sequence.

YAML, JSON, JSONPath

```
---  
# List sequence in Block Style  
applications:  
- Loans  
- Credit Cards  
- Saving Accounts  
- Current Accounts  
  
# List sequence in Flow Style  
locations: [New York, Chicago, Seattle, "Denver"]  
  
# Nested/Embedded Sequences  
products:  
- Loans:  
  - Home Loan  
  - Education Loan
```
