

# YAML & JSON : The Next Level

Complex Keys in YAML

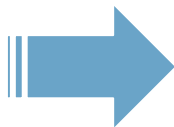

# YAML

# YAML, JSON, JSONPath

- Keys can be Complex in YAML. Complex Keys means where the Key is multi line String.
- “?” followed by space is used to define the start of Complex Keys.

# YAML, JSON, JSONPath

```
---  
? This is key with  
  multiple Lines  
: and this is the Value of  
this complex key  
  
? - dev  
  - pre-production  
  - production  
: - https://example.dev.com  
  - https://exam.pre-prod.com  
  - https://example.prod.com
```

```
{  
  "This is key with multiple  
Lines": "and this is the Value of  
this complex key",  
  "[\"dev\", \"pre-production\",  
\"production\"]": [  
    "https://example.dev.com",  
    "https://example.pre-prod.com",  
    "https://example.prod.com"  
  ]  
}
```
