YAML & JSON : The Next Level

String Style in YAML

YAML, JSON, JSONPath

➤ Strings in YAML doesn't need quotes.

➤ Use of Quote is only required if Value includes special charactr.
  ○ Characters : `{}[],&:*#?|!%@/`

➤ Yes and No, should be enclose in quotes otherwise, they may be treated as boolean Values.

➤ **Folded Style** and **Literal Style** can be used to Spread String across multiple Lines.

YAML, JSON, JSONPath

➢ **Folded Style** : Use > to remove newlines within the Strings.

```yaml
---
organization: Alphabet
about: >
  Alphabet Inc. is an American multinational
  technology conglomerate holding company headquartered in
Mountain View, California.
  It was created through a restructuring of Google on October 2,
2015,
  and became the parent company of Google and several former
Google subsidiaries.
```

YAML, JSON, JSONPath

➢ **Literal Style** : Use | to turn newlines within the Strings into literal newline.

```
---
organization: Alphabet
about: >
  Alphabet Inc. is an American multinational
  technology conglomerate holding company headquartered in
Mountain View, California.
  It was created through a restructuring of Google on October 2,
2015,
  and became the parent company of Google and several former
Google subsidiaries.
address: |
  1600 Amphitheater Parkway Mountain View
  California 94043
  United States
```
